

NDIA SBA Conference 2001

Simulation Based Acquisition Applied To C2 Enterprise Integration & Interoperability

15 May 2001

Lt Gen Leslie Kenne

Integrity - Service - Excellence

What is SBA?

Why SBA?

Enabling
Enterprise
Management

Processes

Architecture Tools

JSB

AFMC SBA
Roadmap

Conclusion

- **A process that enables key AFMC activities:**
 - Enterprise Management
 - Developmental Planning
 - Capabilities/Effects Based Requirements Development
- **An initiative within AFMC to provide program managers, engineers, testers, logisticians, and technologists with integrated simulations, information technologies and processes to:**
 - Reduce cost & time developing & sustaining systems
 - Support life cycle product improvement
 - Enable information sharing
 - Enhance product quality

A Better Product to the Warfighter – Faster!

How Should SBA Applied?

Why SBA?

Enabling
Enterprise
Management

Processes

Architecture Tools

JSB

AFMC SBA
Roadmap

Conclusion

ATD/ACTD

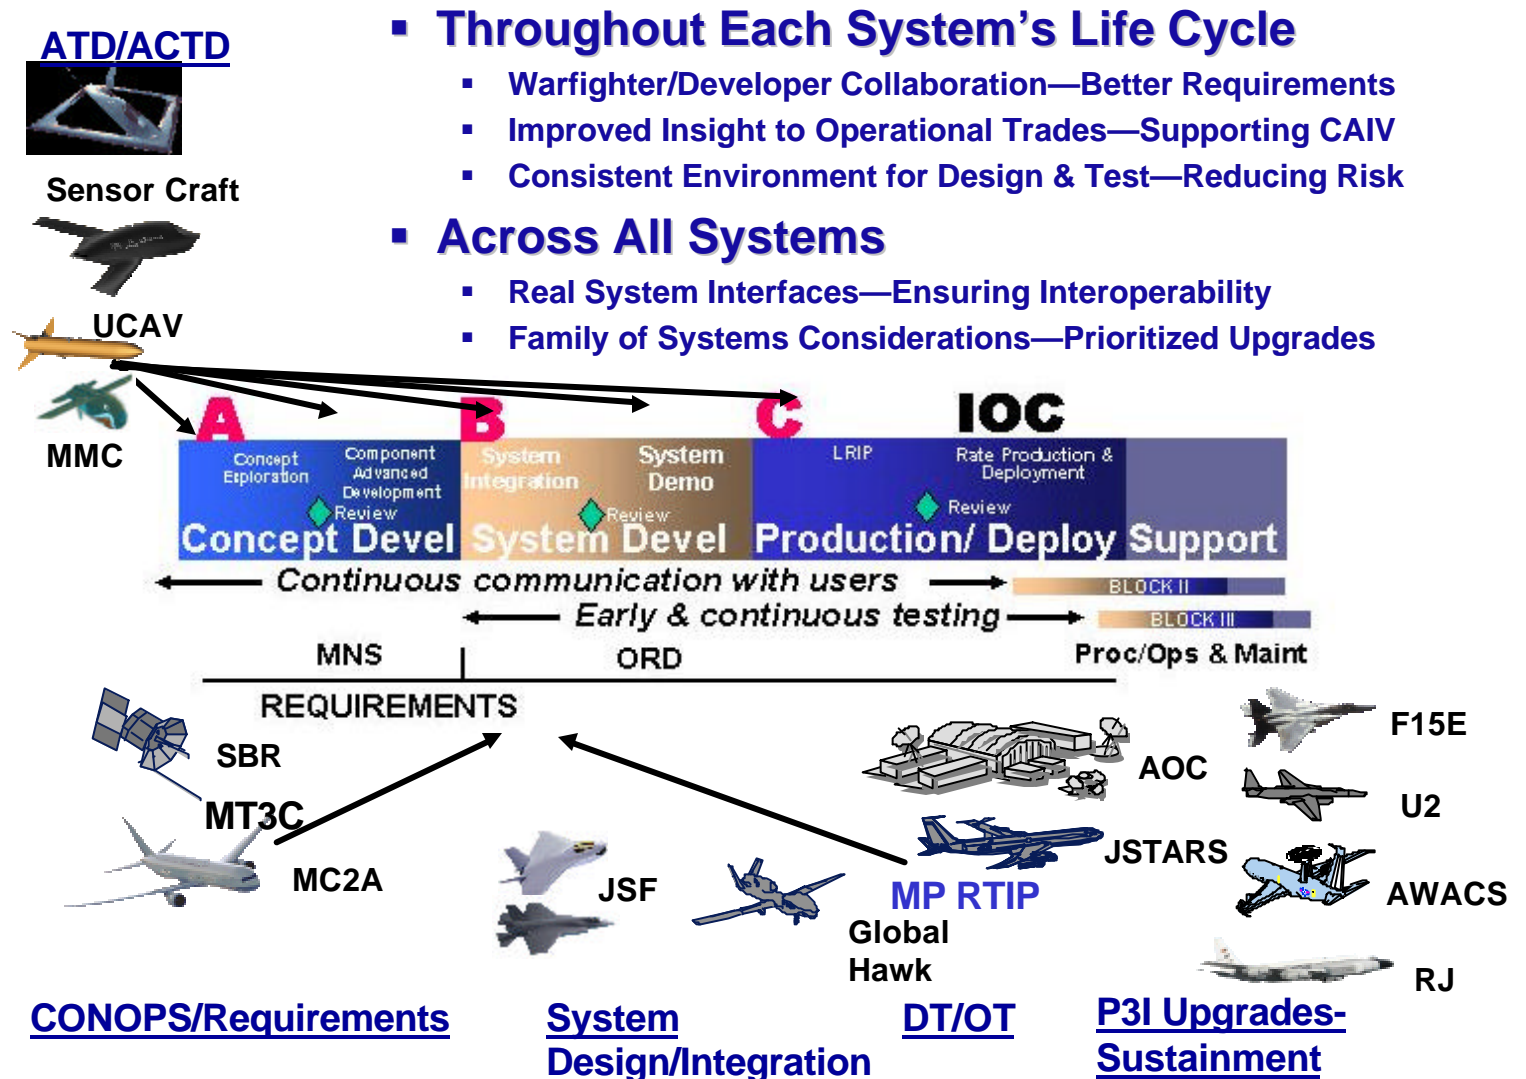

Sensor Craft

UCAV

MMC

Why Implement SBA?

To Address Interoperability Very Early in Design

Why SBA?

Enabling
Enterprise
Management

Processes

Architecture Tools

JSB

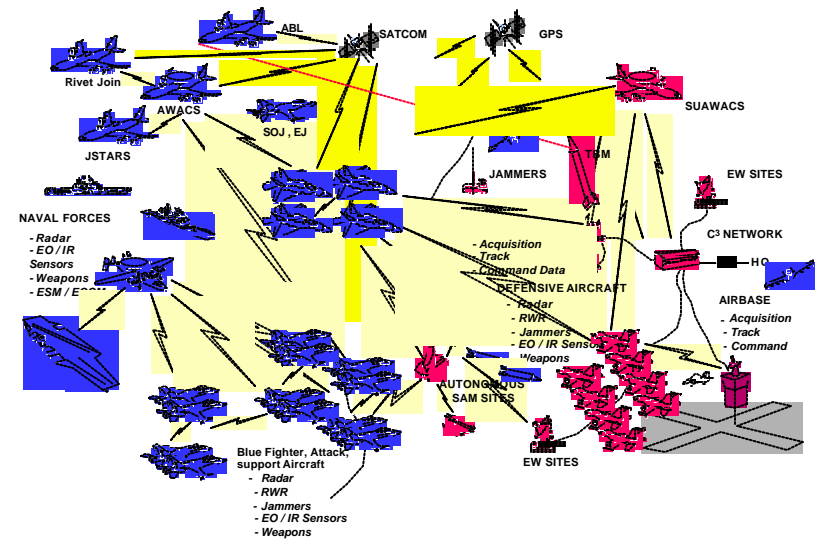

AFMC SBA
Roadmap

Conclusion

Complex Integrated Avionics

Several Million Lines of Code

Multi-Spectral Information Battlespace

Greater Weapon System & Battlespace Complexity Requires A Re-Engineered Acquisition and Sustainment System to Deliver Integrated Family of Systems Solutions to the Warfighter

Interoperability Role of ESC

Why SBA?

Enabling
Enterprise
Management

Processes

Architecture Tools

JSB

AFMC SBA
Roadmap

Conclusion

- *“To ensure C2ISR integration & interoperability issues are effectively addressed, the Electronic Systems Center (ESC) is assigned the lead role and authority for integration of Air Force C2ISR systems. ESC/CC, as the DAC for C2 Enterprise Integration, will direct actions to ensure the integration of C2ISR systems, and to assure their interoperability with Joint and international systems.”*
- *“ESC will also lead C2 Enterprise Integration planning and identification of required resources to ensure all USAF C2ISR systems are integrated and interoperable within the USAF and DoD C2ISR framework.”*

Lawrence J. Delaney, Asst Secretary of the Air Force (Acquisition), 6 Feb 01

- **Enterprise system architecture definition**
- **Enterprise system configuration management & control**
- **Enterprise performance certification**
- **C2 Enterprise Infrastructure Acquisition**

Evolving Our Culture to Achieve Enterprise Integration & Interoperability

Why SBA?

Enabling
Enterprise
Management

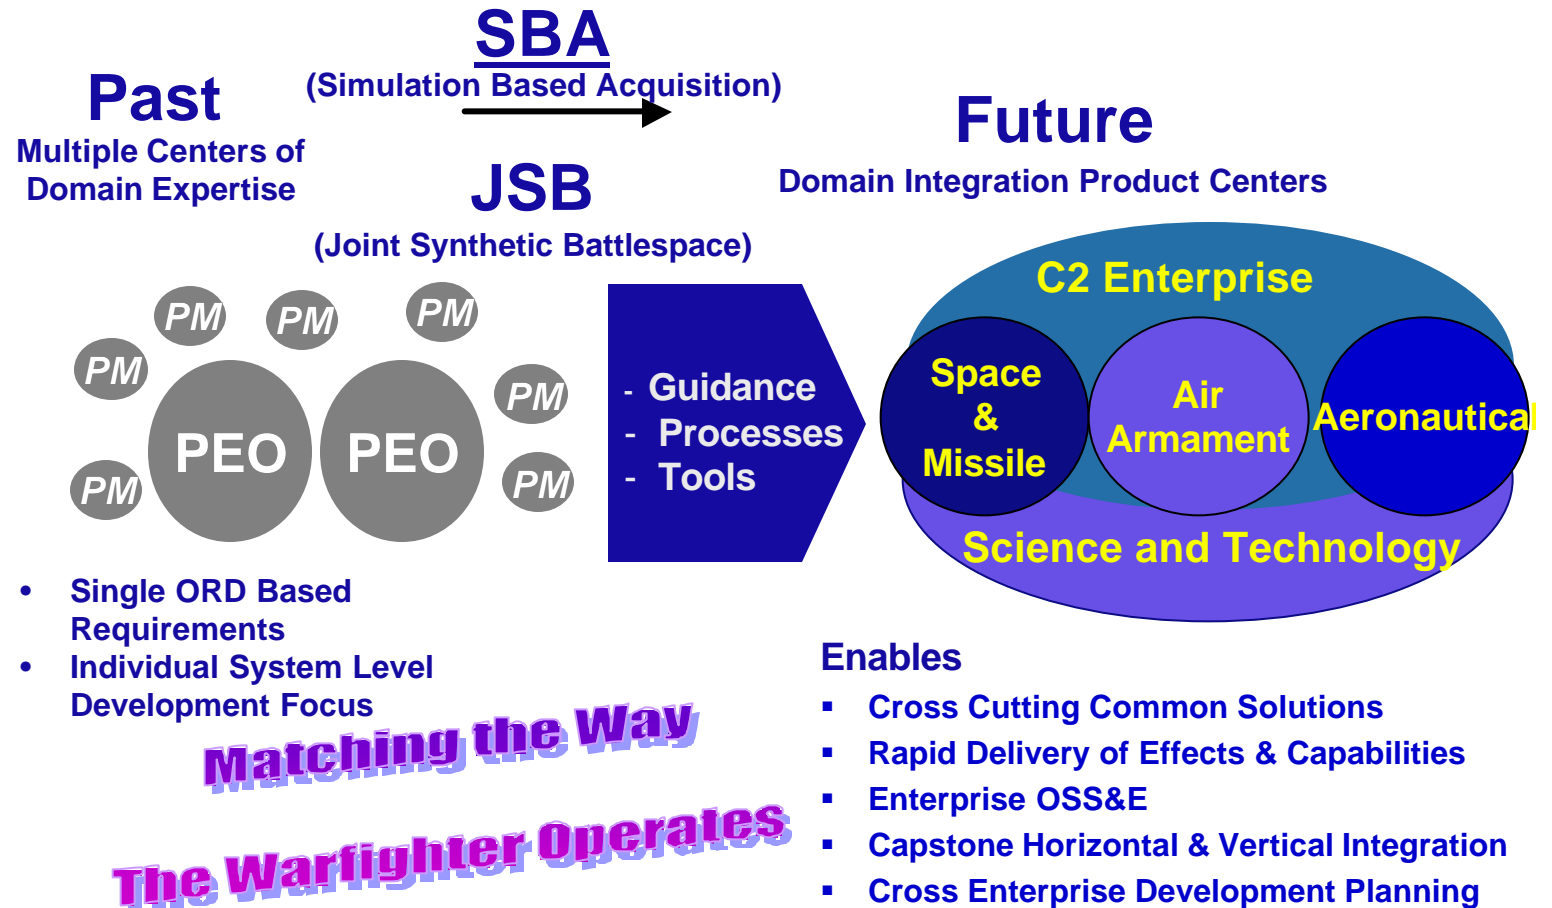

Processes

Architecture Tools

JSB

AFMC SBA
Roadmap

Conclusion

AFMC Mandate -- To Institute the Process and Acquire the Common Infrastructure to Facilitate Domain and Cross Domain Integration of Systems
ACTIVE IMPLEMENTATION OF SBA IS KEY!

SBA Application: Building the Integrated C2 Enterprise

Why SBA?

Enabling
Enterprise
Management

Processes

Architecture Tools

JSB

AFMC SBA
Roadmap

Conclusion

TODAY

FUTURE

Focus:
Data Processing

Focus: Operational Art

Operational Architecture Warfighter View

AFMC SBA
Roadmap

Conclusion

Node Approach:

- Ops Framework
- Single Manager
- Capability Based

Systems Architecture— C2ISR Architect's View

Why SBA?

Enabling Enterprise Management

Processes

Architecture Tools

JSB

AFMC SBA Roadmap

Conclusion

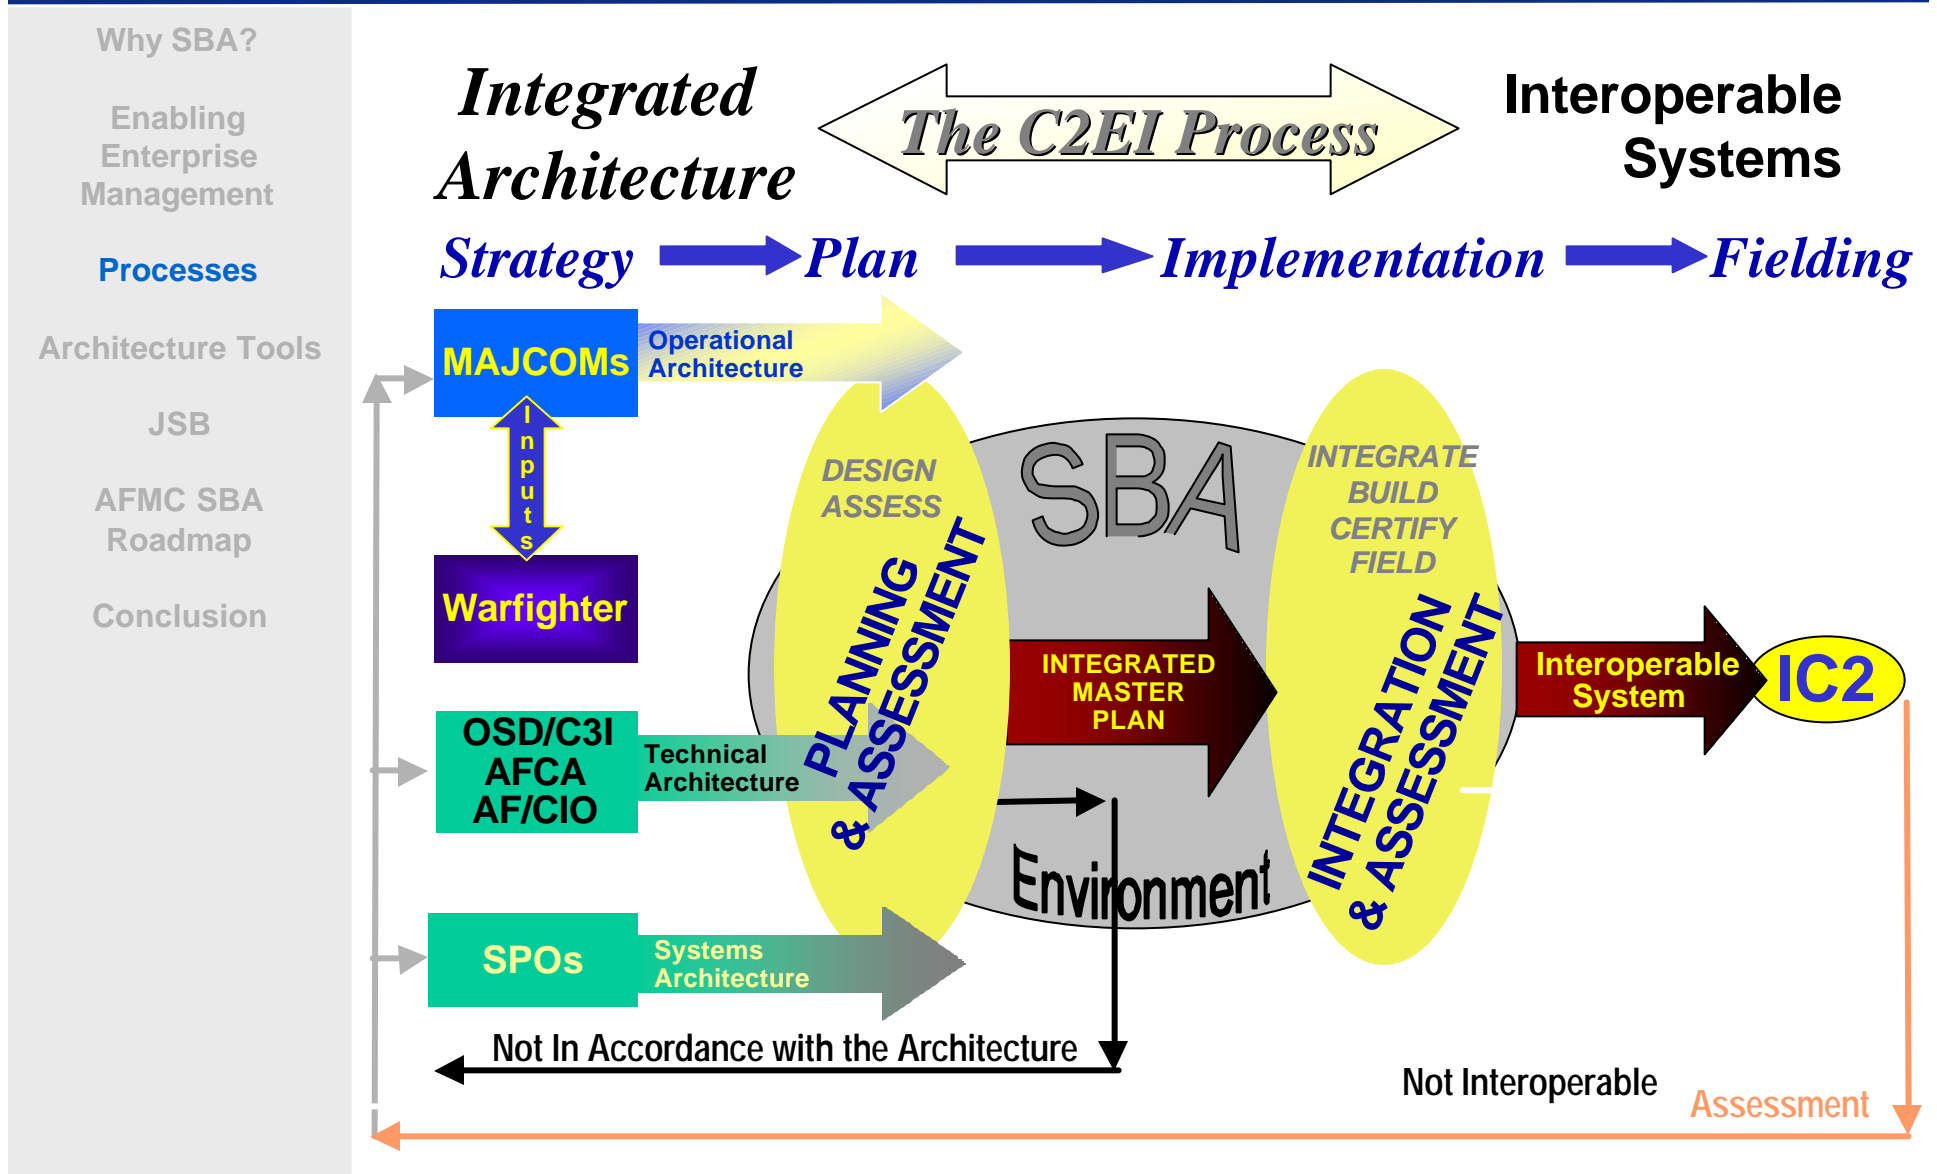

Manage the C2 Enterprise through the nodes.

- **Each SPO is responsible for managing their node--AWACS, JSTARS, AOC, etc..**
- **Integrated Command & Control SPO manages node integration for interoperability.**

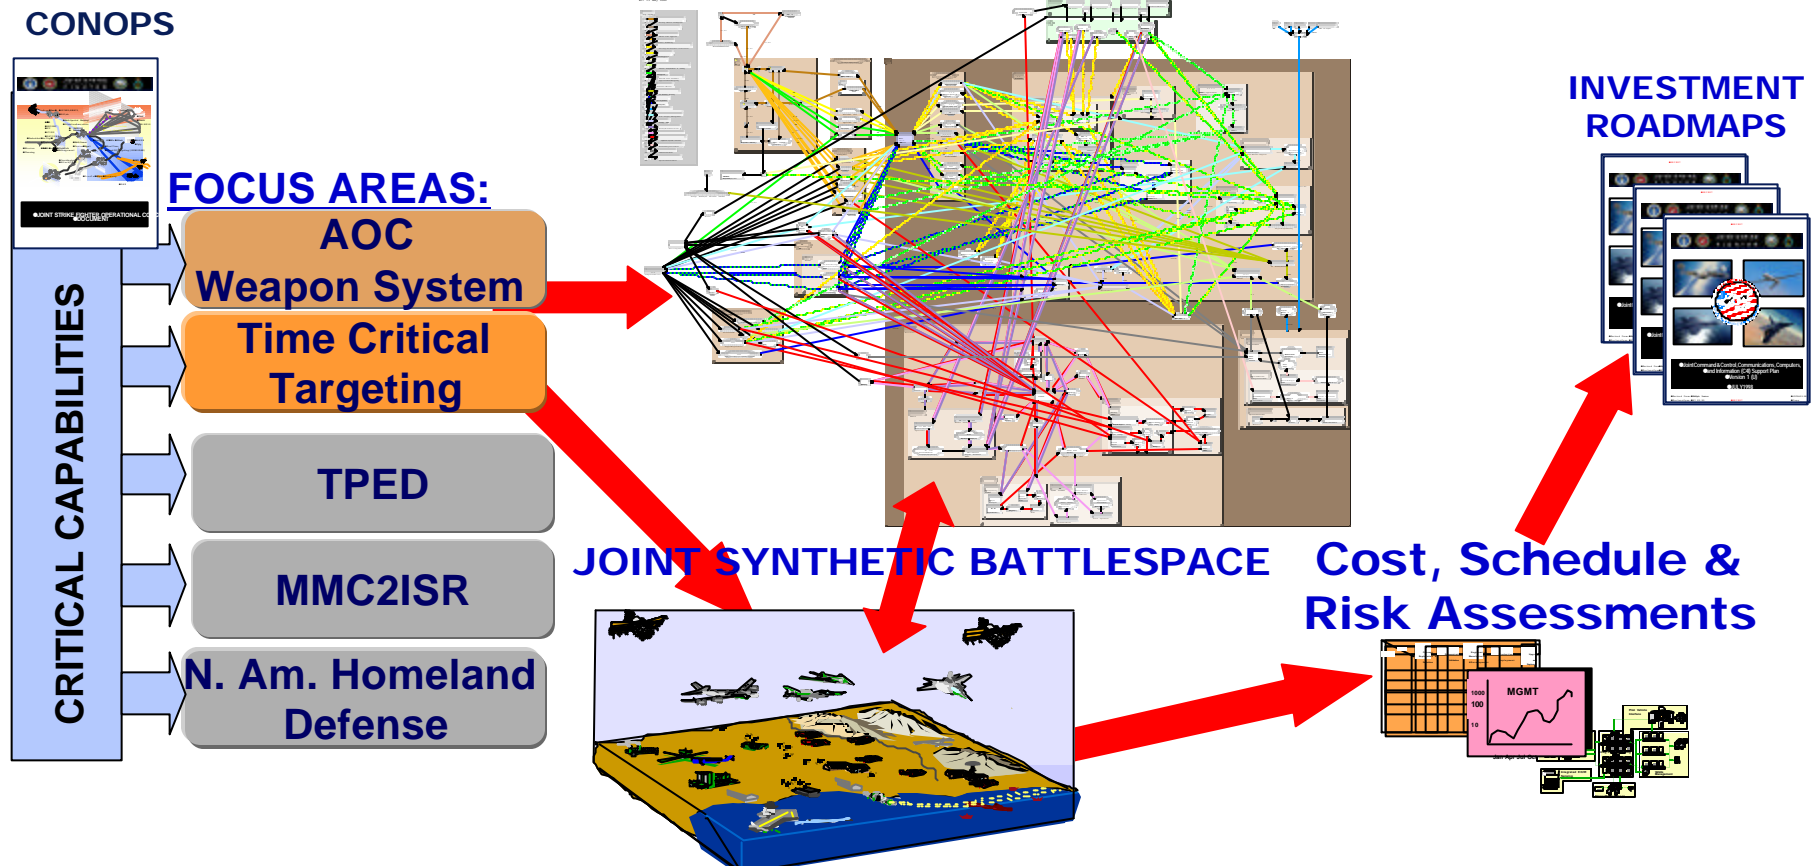

C2 Enterprise Integration Process

C2 Enterprise Assessment Process— Analysis of Roadmap Alternatives

INTEGRATED OPERATIONAL & SYSTEM ARCHITECTURE VIEWS

Tracking Critical Capability “Threads” thru Focus Areas: Assessing Technical Architecture Implications, Addressing Family of Systems Interoperability thru Warfighter-in-the-Loop Synthetic Battlespace Experiments, Assessing Cost-Risk-Schedule of Alternatives and Transforming this Information into Recommended Materiel Solution Roadmaps

Physical Model of C2 Facility

Why SBA?

Enabling
Enterprise

Desert Shift
Multi Loop AOC

Integrated Architecture Tools Can Become a Living C4ISP

Why SBA?

Enabling
Enterprise
Management

Processes

Architecture Tools

JSB

AFMC SBA
Roadmap

Conclusion

■ Today:

- An Acquisition document by the PM
- C4ISP comprised of C4I support requirements, shortfalls, and solutions
- The bulk of the C4ISP information is provided via IERs, Architectures and the System Security Authorization Agreement

■ Tomorrow:

- Integrated Architecture Tool applications are a unique type of modeling that can become the essence of a C4ISP
- Common Data Schema will allow pervasive interoperability assessments by engineers using these tools
- Ensures interoperability “up front” during design—specified to any level of interface—even down to software code

Joint Synthetic Battlespace

A Key Element of SBA

Why SBA?

Enabling
Enterprise
Management

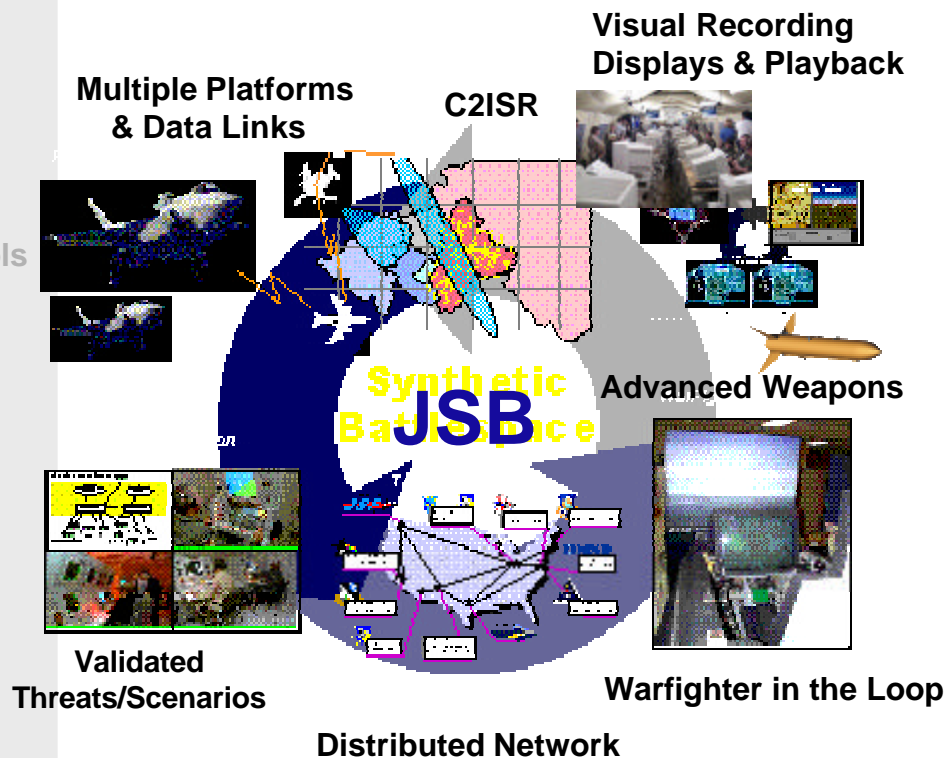

Processes

Architecture Tools

JSB

AFMC SBA
Roadmap

Conclusion

WHY?

Tactical and Analytical Realism

- WarFighter/Developer Collaboration
- Real System Interfaces (HWIL/SWIL)
- Improved Insight to Operational Trades
- Demonstrate Large Scale Exercises
- Interoperability Testing
- Family of Systems approach to System Effectiveness
- True Industry/Government Partnership

Levels Playing Field Across the Industry-Government Enterprise

Joint Synthetic Battlespace

Enabling Tool for System Acquisition

Why SBA?

Enabling
Enterprise
Management

Processes

Architecture Tools

JSB

AFMC SBA
Roadmap

Conclusion

■ Immerses the Warfighter into the Acquisition Process

Quicker Fielding – Avoid Redesign/Mistakes

Cost Avoidance – Total Systems Savings

Improved Product – Better Design/Operator Interfaces

WARFIGHTER

- Training
- Mission Rehearsal
- Operations Definition

Joint Synthetic Battlespace

- Repeatable
- Variable Resolution/Fidelity
- Verified/Validated/Trusted
- Distributed or Standalone
- “Corporate” Infrastructure

ACQUISITION

- Technology Analysis
- Design Trades
- Systems Engineering
- Integration and Test
- Operational Testing

Leveraging Strategic Partnerships to Establish the Synthetic Environment

Why SBA?

Enabling
Enterprise
Management

Processes

Architecture
Tools

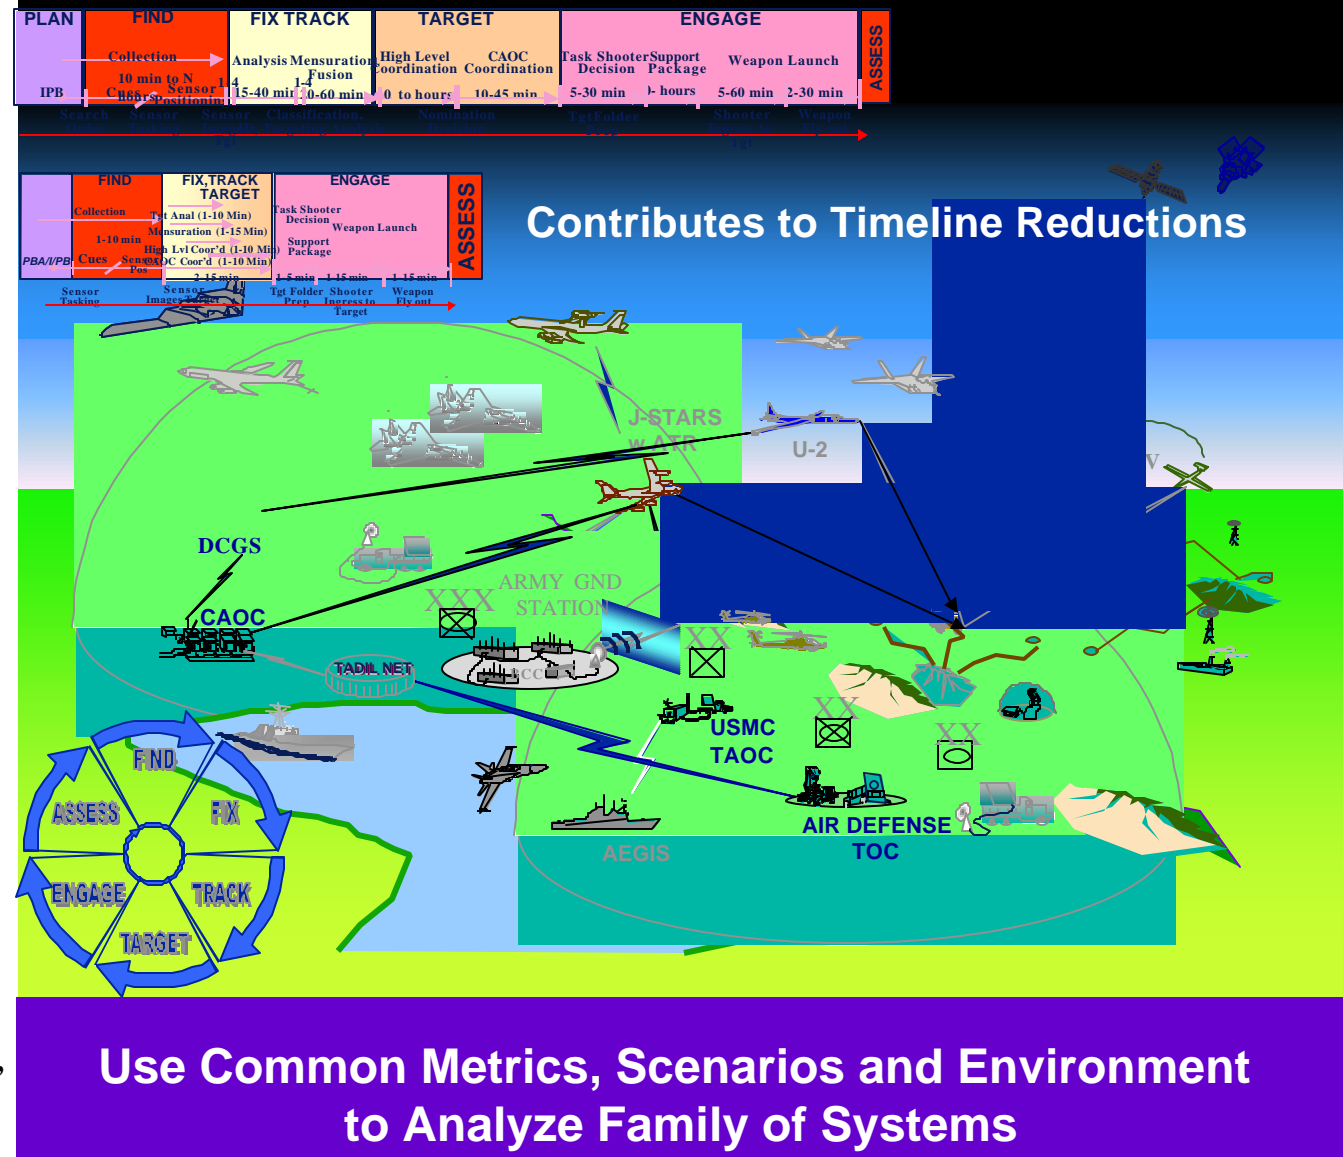

JSB

AFMC SBA
Roadmap

Conclusion

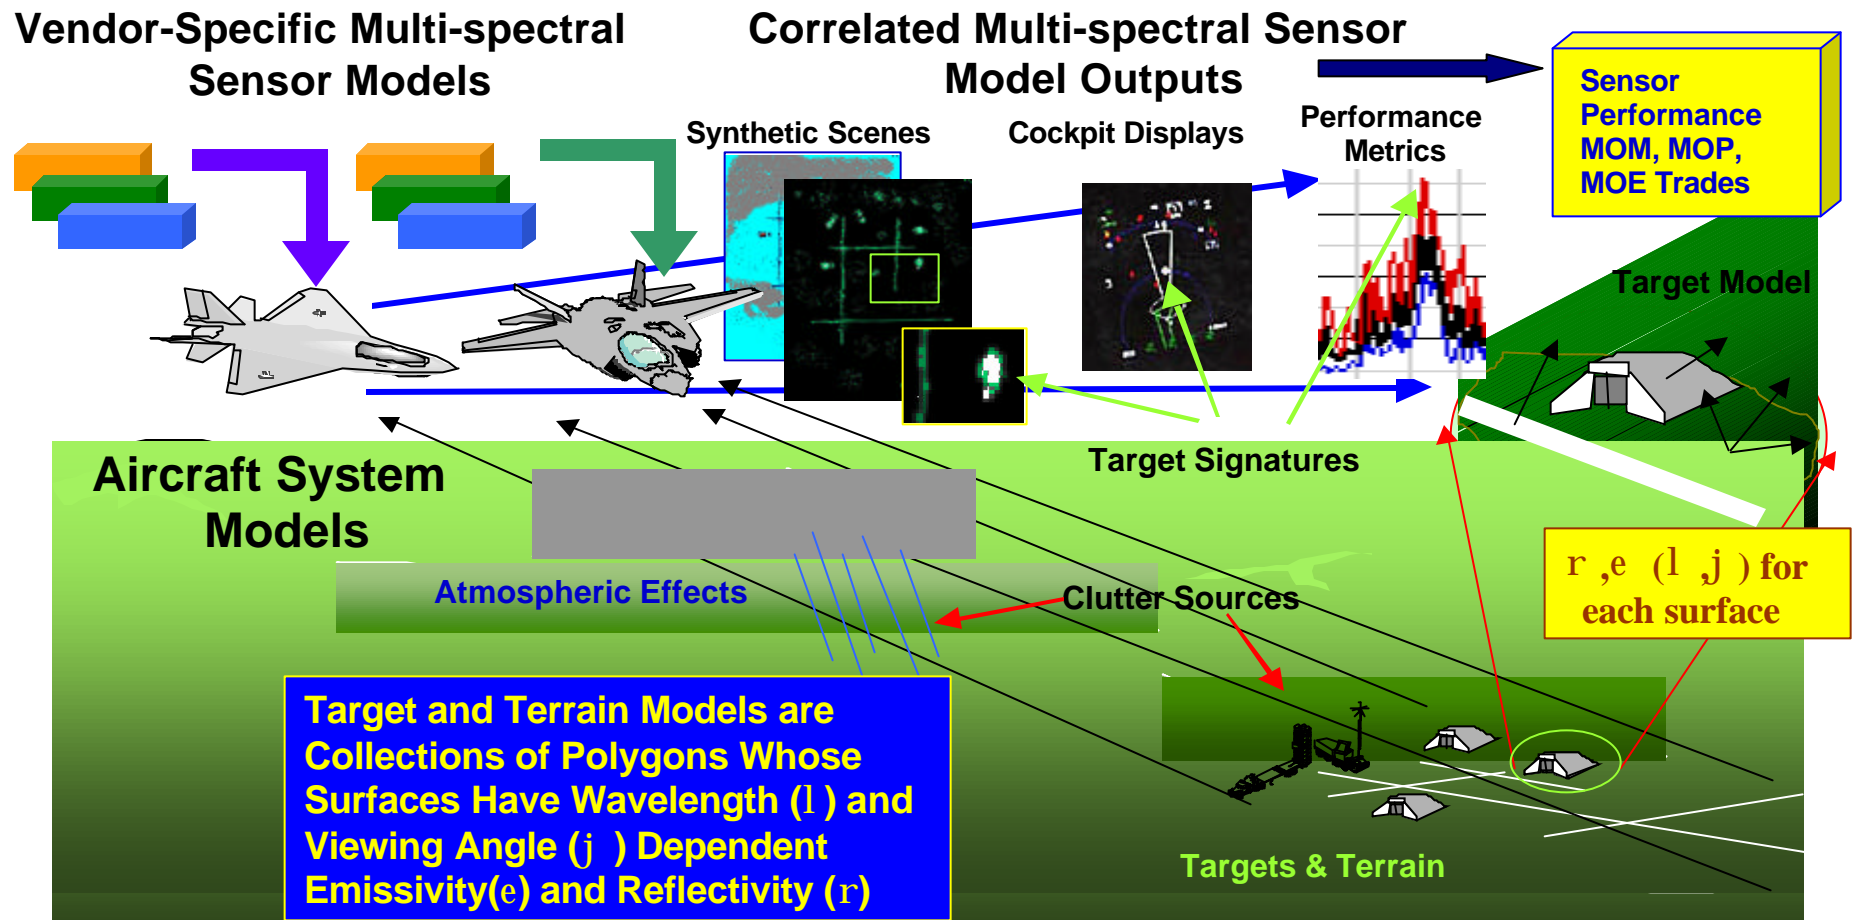

Working with:

- JC2ISR JT&E
- JCIET
- Target Under Trees (TUT) PM
- Global Hawk Upgrades
- Sensor Craft
- MP RTIP
- MT3C Study
- MC2A Constellation Study
- AC2ISRC-TACCSF
- AFSPACECOM
- AAC, ASC, ESC, SMC, AFFTC, AFRL Wide
- XOC-AFAMS
- DARPA, Dept of the Army, RDEC Federation, JPSPD, ACS, FCS...

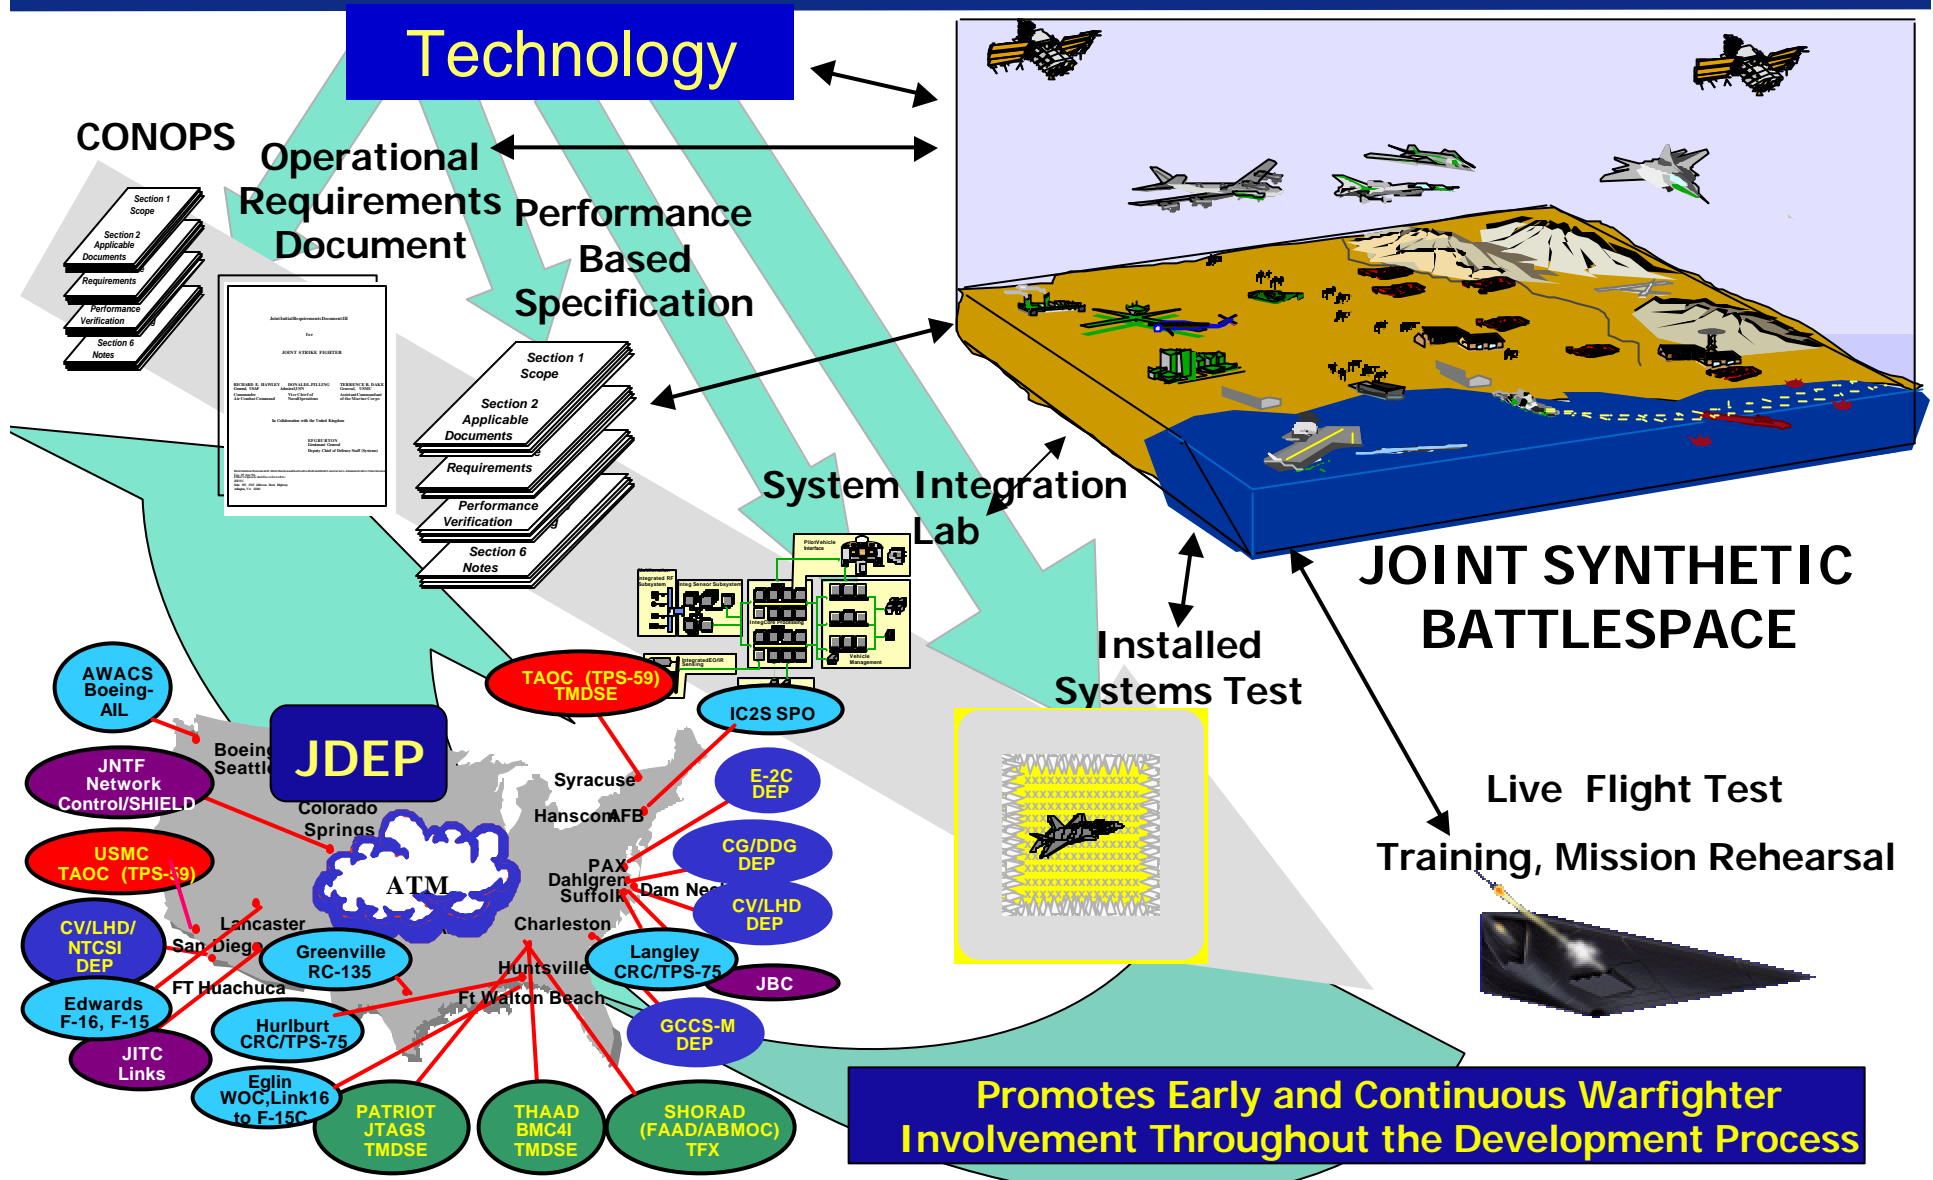

***Need Robust Synthetic Environment
(e.g., Multispectral Sensor Analysis)***

Synthetic Environment At-sensor Radiance/Reflectance a Function of Wavelength, Terrain/Atmosphere Geophysics, Target Physics, Season, ...

SBA and JSB Support To The Acquisition & Sustainment Lifecycle

Impact of Developing Synthetic Battlespace

Why SBA?

Enabling
Enterprise
Management

Processes

Architecture Tools

JSB

AFMC SBA
Roadmap

Conclusion

- **Enables Disciplined Systems Engineering & Testing up to the Joint and Coalition Force Level**
 - Tied to OSD Initiatives (e.g., JDEP, NATO C3 Agency)
 - Joint Partnership (e.g., Army - Joint Virtual Battlespace)
- **Provides Repeatable “Controlled Environment” for Evaluating Joint Force-level Interoperability**
 - Reveals “Why” vice Replicating Interoperability Problems or Capturing Effects
- **Expands Ability to Conduct System-level Interoperability “Fault Isolation”**
 - Controlled Environment to Evaluate “Workarounds” and “Fixes”
- **Enables Validation of Joint Force Operational Tactics, Techniques, and Procedures Prior to Deployment**

Systems Engineered Approach Enables Virtual Integration of Global Strike Task Force

Summary

Why SBA?

Enabling
Enterprise
Management

Processes

Architecture Tools

JSB

AFMC SBA
Roadmap

Conclusion

- **AFMC in Partnership with Industry and the Warfighter is Moving Forward to Develop a SBA/JSB Capability That Addresses the System Acquisition Challenges of Integration and Interoperability**
 - An Architecture driven Systems Engineering process
 - Synthetic Environment Fidelity to Support Systems Engineering—User and Tester validated
 - Level Playing Field Across Industry-Government with Common Environment
 - A program management environment to enable C2 Enterprise Integration and Interoperability
